REPORT.

TO THE RIGHT HON.

LORD BALFOUR OF BURLEIGH,

Her Majesty's Secretary for Scotland.

GENERAL REGISTRY OFFICE OF BIRTHS, ETC.
EDINBURGH, 28*th February* 1900.

MY LORD,

I have now the honour to submit to you, in accordance with the requirements of the Scottish Registration Act (17 & 18 Vict. cap. 80), a General Abstract of the Births, Deaths, and Marriages registered in Scotland during the year 1899, drawn up in the usual form, with a view to its being laid before Parliament.

I have likewise the honour to submit to you, in accordance with Section 19 of the Vaccination Act (26 & 27 Vict. cap. 108), the Thirty-fifth Annual Report on Vaccination, which includes all the usual details relative to children whose Births were registered in Scotland during the year 1898.

I have the honour to be,

MY LORD,

Your most obedient Servant,

STAIR AGNEW,
Registrar-General.

REPORT TO THE REGISTRAR-GENERAL,

By R. J. Blair Cunynghame, M.D., F.R.S.E.

Sir,

I beg herewith to submit the Report containing the usual details regarding the Births, Deaths, and Marriages registered during the year 1899 in the 1073 Registration Districts throughout Scotland. Appended to the General Report is the Thirty-fifth Report on Vaccination, in which is contained all the available information regarding the administration of the Scottish Vaccination Act, and especially in relation to the vaccination of children born in Scotland during 1898.

Table I.—Population estimated to the middle of each year, with the Number of Births, Deaths, and Marriages registered in Scotland during each of the Years 1855 to 1899, and their Proportion to the Population; also the Excess of Births over Deaths, the Number of Illegitimate Births, and their Proportion to the Total Births.

with the corresponding ratios for last year as seen on Tables I. and II. an increase occurs in the case of the deaths and marriages; a decrease in that of the births.

The excess of births over deaths is 51,108.

BIRTHS.

130,656 births were registered throughout Scotland during the year, giving a birth-rate of 3·05 per cent., or 305 for every ten thousand of the estimated population. Of those 66,816 are males and 63,840 females.

Tables IV. and V. indicate the distribution of those throughout the five groups of Registration districts into which the whole country is primarily divided. In the Principal Town districts the births registered number 56,571, being in the proportion of 3·19 per cent. of the estimated population of the same; 28,880 are males and 27,691 females. In the Large Town districts they are 18,421, being at the rate of 3·20 per cent. of the inhabitants; males 9468, females 8953. In the Small Town districts the births are 28,151, giving a birth-rate of 3·14 per cent.; males 14,291, females 13,860. In the Mainland-Rural districts they are 24,912, at the rate of 2·72 per cent.; males 12,835, females 12,077. In the Insular-Rural districts the natal events number 2601, or 2·15 per cent. of the inhabitants; males 1342, females 1259. These proportions indicate the highest birth-rate to have been in the Large Town districts, followed in order by the Principal Town districts, Small Town districts, Mainland-Rural districts, and Insular-Rural districts,

Of the total births, 8488 were illegitimate, equivalent to 6·50 per cent. of the whole. This rate varies considerably in the different districts, being 8·8 per cent. of the births in the Mainland-Rural districts, 6·3 per cent. in the Principal Town districts, 6·0 per cent. in the Small Town districts, 5·4 per cent. in the Insular-Rural districts, and 5·1 per cent. in the Large Town districts.

Table VI. indicates the proportion of illegitimate births to every hundred births in each of the eight divisions, and in each county of Scotland. The highest rate, that of 11·5 per cent., occurs in the North-

cent. The rate in the counties varies from 14·1 per cent.—the highest—in Wigtown, to 3·0 per cent.—the lowest—in Shetland. In eight counties the rate is above 10·0 per cent.; those showing the highest are Aberdeen with 11·2 per cent., Caithness with 11·5 per cent., Kirkcudbright with 11·8 per cent., Elgin with 12·6 per cent., Banff with 13·4 per cent., and Wigtown with 14·1 per cent.

Of the total 130,656 births registered during the year in Scotland, 66,816 are of the male sex and 63,840 of the female, the proportion of the former being to the latter as 104·7 is to 100, a proportion varying in each district, the highest occurring in the Insular-Rural districts, where for every 100 girls 106·6 boys were born, the lowest in the Small Town districts with the latter ratio of 103·1.

Births were registered daily throughout the country month by month as follows:—331 during December, 335 during February, 344 during January and November, 351 during March, 356 during September, 357 during August, 361 during July, 363 during October, 374 during April, 378 during June, and 400 during May.

DEATHS.

79,548 deaths were registered throughout Scotland during the year—males 39,919, females 39,629, together giving a mortality-rate of 1·86 per cent., or 186 in every ten thousand of the population as estimated.

The rate varies in each district, the highest occurring in the Principal Town districts of 202 per ten thousand of the inhabitants of the same, followed by the Large Town districts with a rate of 187 per ten thousand, the Small Town districts with one of 175, the Mainland-Rural districts with one of 167, the lowest being in the Insular-Rural districts of 156 in like ratio.

The average number of daily deaths was registered in each month as follows:—183 during July, 188 during October, 193 during November, 205 during June, 213 during September, 215 during August, 217 during April, 218 during May, 222 during December, 233 during January, 244 during March, and 288 during February.

MARRIAGES.

32,935 marriages were registered in Scotland during 1899, which gives a marriage rate of 77 in every ten thousand of the estimated population.

This rate, as with the other rates, varies in the different districts, the highest—95 per ten thousand—occurring in the Principal Town districts, the lowest, 39, in the Insular-Rural districts, the intermediate rates being 77 in the Large Town districts, 70 in the Small Town districts, and 54 in the Mainland-Rural districts.

The number of marriages reported to the Registrars each month is—1228 during May, 1571 during March, 1636 during February, 2060 during August, 2085 during September, 2130 during November, 2185 during October, 2444 during April, 4041 during January, 4218 during July, 4394 during December, and 4943 during June.

EIGHT OF THE PRINCIPAL TOWNS OF SCOTLAND.

The remarks which follow refer to the births, deaths, and marriages which occurred during the year under review in the following Eight Principal Towns in Scotland, viz., Glasgow, Edinburgh, Dundee, Aberdeen, Leith, Paisley, Greenock, and Perth, the information upon which they are founded being furnished by periodical returns sent by the Registrars of the same. It is considered that the facts relating to these towns apply in a great degree to the country at large.

BIRTHS IN THESE EIGHT TOWNS.

49,753 births were registered in these towns during the year, which gives a birth-rate of 313 in every ten thousand of their population as estimated. The highest rate occurs in Greenock, where it is 343 per ten thousand; followed by Aberdeen with a rate of 331, Glasgow with one of 330, Paisley with one of 319, Leith with one of 310, Dundee with one of 287, Perth with one of 279, and Edinburgh with one of 275.

Of the total births 46,469 were legitimate and 3284 illegitimate—*i.e.*, 6·6 of the latter in every hundred births. Illegitimate births were registered in the largest proportion in Dundee, where they form 8·3 per cent. of the total births; followed by Aberdeen with 7·3 per cent., Edinburgh with 7·1 per cent., Perth with 6·9 per cent., Glasgow with 6·5 per cent., Greenock with 4·8 per cent., Paisley with 4·6 per cent., and Leith with 4·2 per cent.

Table VIII. also gives the proportion of illegitimate births registered during the year to the possible mothers—*i.e.*, spinsters and widows between the ages of 15 and 45 years estimated to be living in these towns. Glasgow comes first with 1·59 per cent. of such, followed by Aberdeen with 1·53 per cent., Dundee with 1·41 per cent., Greenock with 1·35 per cent., Perth with 1·21 per cent., Leith with 1·15 per cent., Edinburgh with 1·11 per cent., and Paisley with 0·93 per cent.

Of the births in these towns 25,384 are males and 24,369 females, so that for every 100 of the latter there were born 104·2 of the former.

DEATHS IN THESE EIGHT TOWNS.

32,430 deaths were registered in these towns during the year, being at the rate of 204 in every ten thousand of their estimated population. The male exits are 16,329, and the female 16,101.

The mortality-rate is highest in Greenock, where 217 in every ten thousand of the inhabitants died during the year; followed by Glasgow with a rate of 216, Edinburgh and Paisley each with a rate of 196, Perth with one of 194, Dundee with one of 192, Aberdeen with one of 191, and Leith with one of 182. When these rates are compared with the corresponding for last year (Table IX.) a higher rate is seen to occur for the year under review in Glasgow, Leith, and Greenock; a lower rate in Dundee, Paisley, and Perth, the rate being the same in Edinburgh and in Aberdeen. When a further comparison is made between the present year and the mean of the preceding ten years, it is seen that in the case of each town the death-rate for 1899 is under that of the mean, with the exception of Greenock, where it is higher, and of Edinburgh, where it is the same.

Table X. is computed to afford some information as to the mortality among children under five years of age in these towns. The total number of deaths at this age is 12,110, out of an estimated population of 193,248 of the same years, which gives a death-rate of 63 per thousand. In Greenock the rate is 71 per thousand alive at the same age, in Glasgow it is 67, in Dundee it is 62, in Edinburgh and in Leith it is 59, in Aberdeen it is 57, in Paisley it is 53, and in Perth it is 43. When the mortality is calculated to the total deaths, the last column of the Table indicates how in every hundred deaths in Leith 42·1 were of children under five years of age; in Greenock the percentage was 41·3, in Glasgow it was 39·1, in Dundee it was 37·9, in Aberdeen it was 36·8, in Paisley it was 35·4, in Edinburgh it was 32·2, and in Perth it was 24·4.

Tables XI. and XII. give the percentage of deaths from various diseases in these towns, the former Table computed with reference to the population, the latter to the total deaths from all causes. In the eight towns collectively the mortality-rate is 2·043 per cent. of their inhabitants estimated to be alive. The rate varies in each town from 2·170 per cent. in Greenock—the highest, to 1·822 per cent.—the lowest—in Leith. The rate from Zymotics in the towns together is 0·298 per cent. of their population, and is equal to 14·57 per cent. of the total deaths in the same. The highest mortality-rate from Zymotics is in Greenock, where 0·366 per cent. of the inhabitants died from those diseases; in Glasgow the rate is 0·321 per cent., in Aberdeen it is 0·304 per cent., in Paisley it is 0·297 per cent., in Leith it is 0·289 per cent., in Perth it is 0·266 per cent., in Edinburgh it is 0·256 per cent., and in Dundee it is 0·248 per cent. In Paisley in every hundred deaths 4·85 were caused by Diarrhœa and Dysentery, 2·26 by Fevers (2·12 Enteric), 1·99 by Hooping Cough, 1·73 by Influenza, 1·26 by Scarlet Fever, 1·20 by Measles, and 0·86 by Diphtheria.

In Greenock in every hundred deaths 6·49 are due to Diarrhœa and Dysentery, 5·88 to Measles, 1·53 to Scarlet Fever, 0·99 to Diphtheria, 0·69 to Fevers (all Enteric or Typhoid), and 0·38 to Hooping Cough and to Influenza.

In Perth in every hundred deaths 3·74 are ascribed to Diarrhœa and Dysentery, 2·72 to Hooping Cough, 1·87 to Scarlet Fever, 1·36 to Measles, 1·19 to Influenza, 1·02 to Diphtheria, and 0·85 to Fevers (all Enteric).

In the eight towns together Diarrhœa and Dysentery caused 1197 deaths, being at the rate of 3·72 per cent. of the total mortality in the same, and in the ratio of 7·6 in every ten thousand of their inhabitants. 561 of these occurred in Glasgow, 175 in Edinburgh, and 154 in Dundee. Measles caused a total of 938 deaths, equal to 2·92 per cent. of all the deaths, and 6·0 in every ten thousand of the population of these towns. 548 of these deaths are in Glasgow, 134 in Aberdeen, and 81 in Edinburgh. Hooping Cough caused 808 deaths, equal to 2·51 per cent. of the total deaths, and 5·1 per ten thousand of the population. 328 of those are registered in Glasgow, 197 in Edinburgh, and 100 in Leith. To Influenza 363 deaths are ascribed, at the rate of 1·13 per cent. of the total deaths, and 2·3 in

every ten thousand of the inhabitants of the eight towns. 160 of those fall to Glasgow, 92 to Edinburgh, and 49 to Aberdeen. Fevers caused 343 deaths, being at the rate of 1·07 per cent. of all deaths, or 2·2 per ten thousand of population. 187 of these are registered in Glasgow, 51 in Edinburgh, and 34 in Paisley. Typhoid or Enteric Fever caused 319 of the whole; Typhus Fever caused 16; Cerebro-Spinal Fever, 3; and Simple or Ill-Defined, 5. The Typhus occurred in Glasgow, Edinburgh, Dundee, and Paisley; the Cerebro-Spinal in Glasgow and Paisley. To Scarlet Fever 340 deaths are due, at a rate of 1·06 per cent. of all the deaths, or 2·2 per ten thousand of the inhabitants. 202 of those occur in Glasgow, and 53 in Edinburgh. Diphtheria is the cause of 261 deaths, equal to 0·81 per cent. of the total, or 1·7 in every ten thousand of population. 106 of those are in Glasgow, 49 in Edinburgh, and 36 in Dundee.

Small Pox caused one death in Glasgow.

Zymotics together caused 4648 deaths, in the proportion of 14·57 per cent. of the total mortality, or 29·8 in every ten thousand of the inhabitants. To Syphilis 131 deaths are ascribed, to Erysipelas 63, and to Puerperal Fever 85.

Diseases of a Constitutional character caused 6234 deaths, thus constituting 19·39 per cent. of all the deaths, or 39·6 in every ten thousand of the population. Rheumatism and Rheumatic Fever caused 163 deaths; Cancer 1415, or 4·40 per cent. of all, and 9·0 per ten thousand of the population; most marked in Glasgow, Edinburgh, Dundee, and Aberdeen. Gout accounts for 2 deaths. Phthisis caused 3033 deaths, at the rate of 9·43 per cent. of the total mortality, and 19·3 in every ten thousand of the population, the highest rate falling in Glasgow, Leith, Dundee, and Greenock. Tubercular Meningitis caused 558 deaths, Tabes Mesenterica 463, and other forms of the Tubercular condition 357.

To Diseases of the Nervous System 3643 deaths are due, equal to 11·33 per cent. of all deaths, or 23·1 in every ten thousand of the population of the eight towns. In Glasgow the rate was 22·7 per ten thousand, in Edinburgh it was 23·2, in Dundee 22·2, in Aberdeen 22·7, in Leith 20·1, in Paisley 27·2, in Greenock 30·1, and in Perth 25·3.

Diseases of the Circulatory Organs caused 2722 deaths, a rate of 8·47 per cent. of the total mortality, and equal to 17·3 in every ten thousand of the inhabitants; the latter rate being in the case of each town as follows:—16·1 in Glasgow, 20·7 in Edinburgh, 18·3 in Dundee, 17·0 in Aberdeen, 13·1 in Leith, 16·3 in Paisley, 19·1 in Greenock, and 17·4 in Perth.

Diseases of the Respiratory Organs caused 6267 deaths, at the rate of 19·49 per cent. of all deaths, or 39·8 per ten thousand of population. In Glasgow the rate to the inhabitants as thus estimated is 46·5, in Edinburgh it is 31·6, in Dundee 36·1, in Aberdeen 32·3, in Leith 33·3, in Paisley 37·9, in Greenock 43·6, and in Perth 29·9. Bronchitis caused 2867 deaths in these towns, and Pneumonia 2759, the highest rate from those falling in Glasgow, Paisley, and Greenock. Pleurisy caused 161 deaths, and Croup 36.

From Diseases of the Organs of Digestion there were 2383 deaths, equal to 7·41 per cent. of all, and 15·1 in every ten thousand of the inhabitants. Enteritis caused 830 deaths, Peritonitis 273, Liver Disease 272, and Dentition 212.

To Diseases of the Urinary Organs 793 deaths are ascribed, in the proportion of 2·47 per cent. of all, or 5·0 in every ten thousand of population. Nephritis accounts for 197, Bright's Disease for 355, and Disease of the Bladder and Prostate for 107.

Premature Births account for 962 deaths, Congenital Malformations for 182, and 1205 are ascribed to Old Age.

From Atrophy and Debility 1007 deaths are registered; from Dropsy 31; while in 275 the death was sudden and the exact cause not ascertained, or was due to ill-defined or not specified causes.

Violent Deaths are in all 1310, forming 4·07 per cent. of the total, and 8·3 per ten thousand of the inhabitants of the towns. Of these, 1249 are due to Accident or Negligence, while 61 are due to Homicide and Suicide. The Suicides are 60 in all, and were committed as follows:—30 by Hanging, 14 by Cutting or Stabbing, 8 by Shooting, 3 by Drowning, 2 by Poison, 2 by Precipitation, and 1 by Suffocation.

103 deaths are ascribed to Intemperance, 77 from Chronic Alcoholism, and 26 from Delirium Tremens.

134 Old Persons died in the eight towns during the year at ages of 90 and upwards, 39 being men and 95 women. The oldest were a labourer at 99 years and a widow aged 101 years.

MARRIAGES IN THESE EIGHT TOWNS.

15,378 marriages were registered in these towns during 1899, being in the proportion of 97 in every ten thousand of the estimated population. This rate was 102 in Glasgow and in Edinburgh, 81 in Dundee, 100 in Aberdeen, 79 in Leith, 81 in Paisley, 91 in Greenock, and 101 in Perth.

WEATHER AND ITS INFLUENCE ON MORTALITY.

The following remarks on the weather of the year are extracted from the Notes made by Dr. Buchan, under the direction of the Council of the Scottish Meteorological Society, which appear in the Registrar-General's Monthly Reports:—

January was characterised by an unusually low mean barometric pressure, accompanied with an unusually large monthly range; a mean temperature somewhat under the average, with a mean daily range half a degree above it; a mean humidity higher than any recorded since January 1875; a very large mean rainfall, larger than has occurred since 1884, and falling on four days more than the average; and winds, as regards direction, nearly the average, blowing with a mean force very much below the average.

February was characterised by a barometric pressure a little less than the average, with a monthly range very considerably above it; a mean temperature slightly under the average, with a mean daily range very considerably above it; a mean humidity, the average; a mean rainfall, somewhat less than the average, falling on two days fewer than the average; a wind force much under the average, with four days excess of S.E. winds and calms, and four days deficiency of westerly winds.

March was characterised by a barometric pressure, with a monthly range both considerably above the average; a mean temperature a degree above the average, with a mean daily range slightly above it; a mean humidity much under the average; a mean rainfall a quarter of an inch above the average, falling on the average number of days; a wind

force greatly above the average, and as regards direction an excess of two days S.W., one day W., and one day N.W.; winds from E.N.E., being four days short of the average.

April was characterised by an unusually low mean barometric pressure, with a monthly range considerably less than the average; a mean

temperature nearly a degree under the average, and a mean daily range half a degree under the average; a low mean humidity; a mean rainfall an inch in excess of the average, and falling on six days more than the average; a mean wind force greatly above the average, and, as regards direction of wind, N.E. and N.W. winds were three days more than the average.

May was characterised by a high mean barometric pressure, with a monthly range much above the average; an unusually low mean temperature, and a mean daily range about half a degree under the average; a mean humidity about the average; a very large rainfall, being the second largest yet recorded by the Society, falling one day in excess of the average; and as regards direction of wind, an excess above the average of three days of N.E. and three days of E. wind.

June was characterised by a high mean barometric pressure, accompanied with a high monthly range; a very high mean temperature, with a very high mean daily range; a mean humidity much under the average; a rather small rainfall, falling on three days fewer than the average; and a large excess of south-easterly winds, blowing with a force much less than the average of June.

July was characterised by a high mean barometric pressure, with a very large monthly range; a very high mean temperature, with a mean daily range a little under the average; a mean humidity rather above the average; a mean rainfall about a quarter of an inch above the average, but falling on three days fewer than the average; and two days' excess of north-westerly winds, and two days' deficiency of west south-westerly winds.

August was characterised by an unusually high barometric pressure, with an unusually small monthly range; an unusually high mean temperature, with a larger mean daily range than any hitherto recorded for August;

an average mean humidity; a smaller mean rainfall than hitherto recorded, except in August 1869, which was 0·06 inch less than that of August last, the rain falling on only eight days, being less than half the number of rainy days for the month; and a great excess of calms and E.N.E. winds, the mean force of the wind being the lowest yet recorded.

September was characterised by a low barometric pressure, with a monthly range a little less than the average; a mean temperature nearly half a degree less than the average, with a rather large mean daily range; a mean humidity greatly under the average; a mean rainfall 16 per cent. greater than the average, falling on six days more than the average; and an extraordinary predominance of westerly and north-westerly winds, these two directions being together eight days more than the average.

October was characterised by a high mean barometric pressure, with an exceptionally small monthly range; a high mean temperature, with an exceptionally large mean daily range for October, having been only exceeded, and but slightly, by the daily range of 1860; a mean humidity under the average; a mean rainfall much under the average, falling on four days fewer than the average; with a predominance of two days' south-westerly winds and two days of calm.

November was characterised by a high mean barometric pressure, with a correspondingly large monthly range; a mean temperature higher than any hitherto recorded for November by the Scottish Meteorological Society, with a mean daily range a little under the average; a mean humidity considerably under the average; a mean rainfall exceeding the average, falling on the average number of days; and an unprecedently large excess of south-westerly winds, blowing with a force only exceeded in the past by the November of 1881 and 1888.

December was characterised by a mean barometric pressure very

nearly the average, with an unusually large monthly range, having been exceeded only thrice since 1856; a mean temperature nearly three degrees under the average, with the average mean daily range; a mean humidity above the average; a mean rainfall, only slightly less than the average, falling on the average number of days; and a very large excess of south-easterly winds and calms, and a deficiency of west winds, blowing with a greatly diminished force.

Tables XIII. and XIV. give some facts regarding the meteorological conditions of the year, and the mortality among the inhabitants of Scotland which occurred during each month of the same, with, for the sake of comparison, corresponding information for the mean of ten years 1881-1890. The months of January, February, and December have the lowest mean temperature, that for both January and December being lower than for the corresponding months of the series of years. The mean temperature for the whole year is above that of the mean for the ten years, the mean temperature of seven of the months of 1899 being above that for the same months of the ten years. The actual mortality is greater during the colder months than during the warmer, those of summer and autumn.

Table XV., which refers to the eight towns, shows the connection between some atmospherical phenomena and the deaths from certain diseases and classes of disease. There is but one death from Small Pox in these towns during the year, and that occurred during the month of June. Measles and its sequelæ caused its heaviest mortality during the months of March, November, and December, the lowest deaths being recorded during August, September, and October. Scarlet Fever deaths are fairly well distributed in each month, being specially marked during January. Hooping Cough certainly caused its heaviest mortality during the early months of January, February, March, and April, its minimum occurring during September, October, and November. Diphtheria deaths were registered in largest numbers during January, February, September, October, and November, being least in evidence during July and August. Deaths from Fevers bulk most largely during the latter six months of the year, especially during September and October, and Diarrhœal deaths during July, August, September, and October.

Phthisis causes many deaths each month, but in greater number during the first six than during the last six months of the year.

Pneumonia and Bronchitis, the more acute diseases of the respiratory organs, are most marked as causes of death during the early and late months, those in fact when the weather is most inclement and cold, the smallest number of deaths from these being registered during the months of summer and autumn. The same is the case with Heart Affections and Diseases of the Brain, all more or less influenced by climatic conditions, and that especially when the various organs concerned are not sound.

Tables XVII. and XVIII. give the number of deaths registered each month at four series of ages. Thus the mortality among children (0-5 years) was most marked during February, March, August, September, and December; least so during June and July.

Adolescents (5-20 years) succumbed in greatest number during February, May, June, and December; the fewest deaths among them falling during August, September, October, and November.

Among Adults (20-60 years) the greatest mortality occurred during January, February, and March; the least during July and August.

The Aged, or those over 60 years, died in largest numbers during January, February, March, April, and December; the opposite occurring during July, August, and September.

The general mortality among the residents of the above eight towns was greatest during February, gradually falling during January, March, December, August, September, May, April, November, October, June, and July.

THIRTY-FIFTH ANNUAL REPORT

ON THE

VACCINATION OF CHILDREN

BORN IN SCOTLAND DURING 1898.

The Returns of Vaccination for the year 1898 show that of the 130,946 children whose births were recorded in Scotland, 108,981, or 83·226 per cent., were successfully vaccinated. Certificates of postponement of vaccination were granted in 3198 cases, being at the rate of 2·442

per cent. of the total births; 513 children, or 0·392 per cent., were stated to have been insusceptible of vaccination from constitutional peculiarity; and 359, or 0·274 per cent., from having been successfully vaccinated, but by persons unqualified to grant certificates to that effect. 13,891, or 10·608 per cent., of the children born, died before vaccination, and 4004, or 3·058 per cent., were removed from the district in which they were born, or from some other cause were unaccounted for. It therefore appears that for the year 1898 the number of children successfully vaccinated is below the average of the previous ten years, while in the other cases enumerated the numbers are all above the average.

Table XX. shows the proportions to the total number of living children, those who died before being vaccinated being omitted, and from this it is seen that of the 117,055 children alive at the age of six months 108,981, or 93·102 per cent., were successfully vaccinated; the vaccination of 3198 children, or 2·732 per cent., was temporarily postponed; 513 children, or 0·438 per cent., were constitutionally insusceptible; 359, or 0·307 per cent., were insusceptible from having been previously successfully vaccinated; and 4004 children, or 3·421 per cent., were removed from the district in which they were born, or from some other cause were unaccounted for.

Table XXI. shows the number of deaths which have been caused by Small Pox in Scotland during each year from 1855 to 1897, the numbers given for 1898 and 1899 being those which occurred in eight of the Principal Towns only.

APPENDIX.

VACCINATIONS, 1898.

EXTRACTS FROM THE REGISTRARS' NOTES RELATIVE TO THE WORKING OF THE VACCINATION ACT.

I. NORTHERN DIVISION.

2. ORKNEY.

28. SHAPINSHAY.—There has been a good deal of sickness during the year, especially from measles, and consequently vaccinations are behind.

II. NORTH-WESTERN DIVISION.

5. ROSS AND CROMARTY.

Insular.

89. UIG.—The number of postponements appears large, but mostly all are vaccinated, although not certified in consequence of the removal of the Vaccinator. It is expected, however, that they will soon be certified.

6. INVERNESS.

Insular.

111. (1) NORTH HARRIS.—This Return is not satisfactory. Owing to the severity of the weather children could not be brought to the Stations.

111. (2) SOUTH HARRIS.—There is no Medical Officer in the District.

111. (3) BERNERA.—There has been no Vaccinator in the District since last Return; consequently, none of the children have been vaccinated.

119. STRATH.—A new Medical Officer has been appointed, and vaccination is better attended to, but it is still the exception to get any certificates for children under six months.

III. NORTH-EASTERN DIVISION.

9. BANFF.

158 KEITH.—The extra number of "postponed" cases is in consequence of the children being in a weakly state of health and unfit.

IV. EAST MIDLAND DIVISION.

12. FORFAR.

282. (5) LOCHEE (DUNDEE).—The number of parents who have removed from the district, and have not been traced by the Inspector of Poor, is much larger than usual.

13. PERTH.

351.—ERROL.—Only one case unaccounted for, being that of the child of a tinker.

378. MADDERTY.—The three children whose vaccinations are postponed are triplets, and the delicate state of their health has rendered repeated postponement necessary, but now they are getting stronger, it is hoped the operation will soon be performed.

V. WEST MIDLAND DIVISION.

17. STIRLING.

477. DRYMEN.—The extra number of postponements is mainly due to the prevalence of scarlatina in the parish since June.

VII. SOUTH-EASTERN DIVISION.

25. EDINBURGH.

692. (2) SOUTH LEITH.—The large number of houses removed by extensive railway extensions has rendered the tracing of defaulters almost an impossibility.

* The actual number of Districts is 1073—many Parishes and Burghs having been divided into two or more Districts for the purpose of Registration. Thus Edinburgh and Glasgow, to each of which only a single number is assigned in the Tables, consist of 6 and 14 Districts respectively. In forming the alphabetical arrangement the principle adopted has been to place *compound* names in the order in which they are pronounced.
